## **BWA Group PLC**

**("BWA", or the "Company")**

### **Aracari Gold Project - Update**

BWA [AQUIS:BWAP], the mining investment company with licences in Cameroon and Canada, notes the announcement yesterday morning by Oriole Resources PLC (" **Oriole** ") of the maiden JORC Mineral Resource Estimate (" **MRE** ") for its MB01-N deposit, which, together with the MRE for its neighbouring MB01-S deposit, takes the total JORC Inferred Resource at its Mbe project (" **Mbe** ") to 1.23 million ounces (" **oz** ").

#### **Oriole's Chief Executive Officer, Martin Rosser, commented:**

*"...any gold exploration project reporting a more than 1 million oz contained gold deposit is a major achievement and Mbe continues to build upon its status as not only Cameroon's leading gold project, with highly encouraging potential to become a significant open pit gold mine, but is also of a size that already bears favourable comparison with other major discoveries in Africa and the rest of the world."*

The Aracari Project (" **Aracari** "), for which BWA has an Option and Earn-In Agreement to earn up to a 70% equity interest through expenditure of Euro 1.5 million, sits on a strike extending over 60 km in length and 1,268 square km in area from Oriole's Mbe licence. Significant gold sample results were found and reported by the Company on [21 January 2026](#) in Aracari's Bandjoukri Ouest licence area, which is adjacent to Mbe, as shown in Figure 1 below.

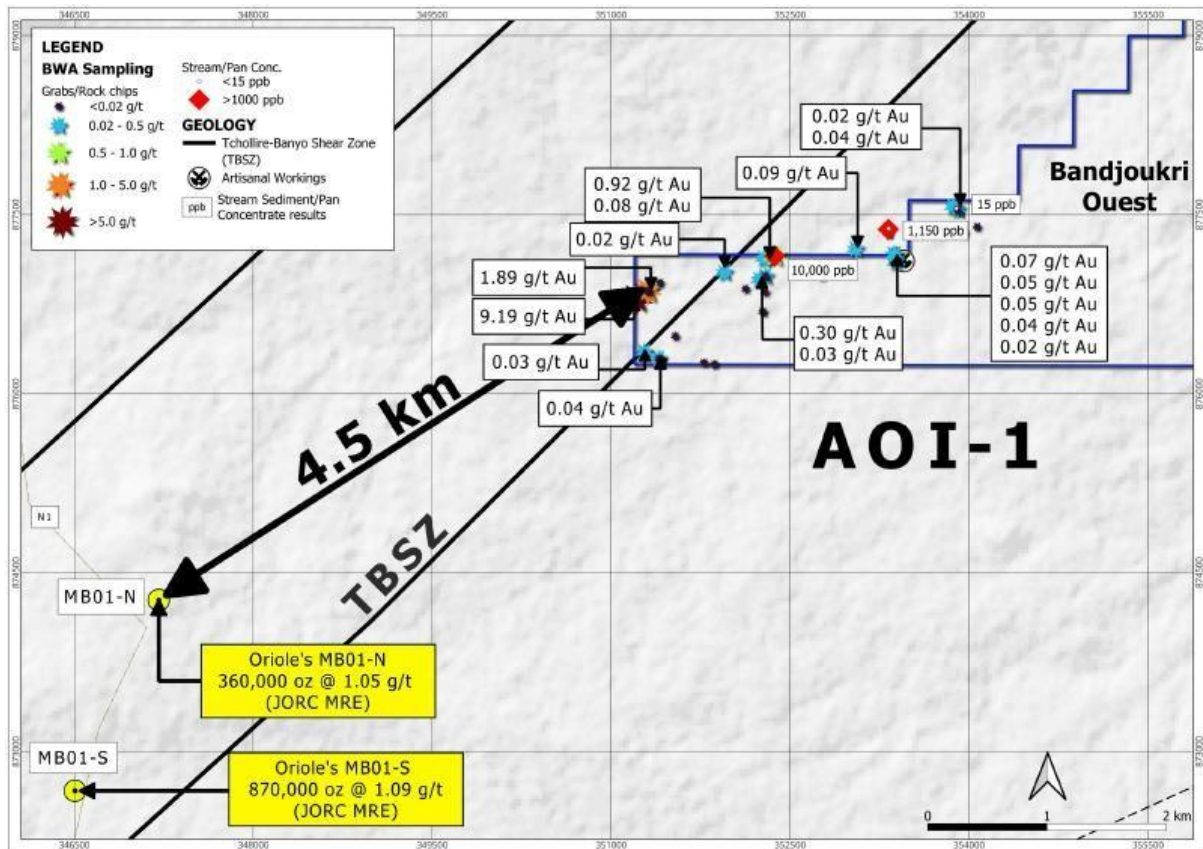

Figure 1 - Proximity of the Oriole Resources - Mbe Mineral Resource Estimates to Aracari Gold Project - Bandjoukri Ouest AOI-01 (Area of Interest).

**Jonathan Wearing, Chairman of BWA Group, commented:**

" The delineation of a JORC compliant Mineral Resource Estimate by Oriole at Mbe, now totalling over 1.2 million ounces, represents a significant validation of the broader mineralised system across this highly prospective district.

Importantly, Aracari's AOI-1 prospect lies within 4.5km of this resource. This proximity not only highlights the geological continuity between Mbe and Aracari, but also underscores the strategic value of our Option and Earn-In Agreement, which provides BWA with meaningful exposure to a rapidly emerging gold district in Cameroon."
